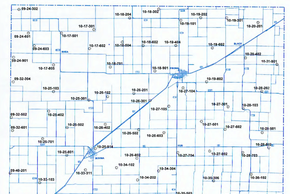
Observation well locations illustrated on county maps

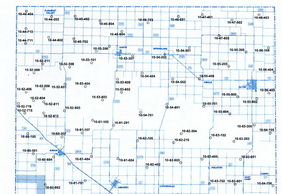
Continued From Page One

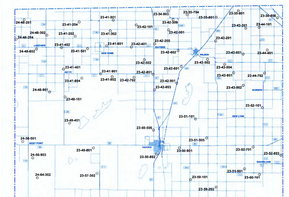
portions of Crosby, Deaf Smith, and Randall Counties within the district recorded an average decline in water levels of less than one foot. Armstrong and Potter Counties revealed average rises in water levels of less than one foot.

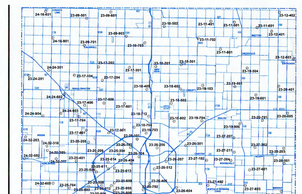
Included in this issue of *The Cross Section* are individual county maps to provide the approximate location of each observation well. Each map is accompanied by available 1994, 1999, 2003, and 2004 depth-to-water level measurements for individual wells in that county. Also listed are available total changes in water levels for each well for the periods 1994 to 2004, 1999 to 2004, and 2003 to 2004.

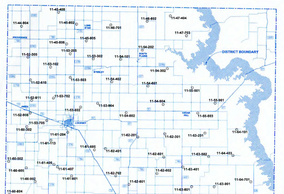
Historically, depth-to-water level measurements show a district average decline of 2.15 feet in 1994; an average decline of 1.91 feet in 1995; an average decline of 1.49 feet in 1996; an average decline of 0.34 of a foot in 1997; an average decline of 2.15 feet in 1998; an average decline of 0.68 of a foot in 1999; an average decline of 1.14 feet in 2000; an average decline of 0.78 of a foot in 2001; and an average decline of 1.06 feet in 2002.

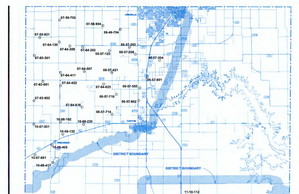












Museum strives to preserve national agriculture heritage

EDITOR'S NOTE – The following article by former Public Information Specialist Erica Irlbeck discusses future plans for the American Museum of Agriculture. Irlbeck serves on the museum's board of directors and High Plains Underground Water Conservation District Manager Jim Conkwright is a member of the museum's advisory board—**CEM**.

By Erica Irlbeck

In an effort to preserve the agricultural history of both the Texas High Plains and the nation, a group of Lubbock area community leaders formed the American Museum of Agriculture.

The museum was officially established in 2001, but the core collection of artifacts began in 1969. At that time, Lubbock County Commissioners established a historical collection for the county. Past Commissioner Alton Brazell directed efforts to collect items of historical value, with an emphasis on farm machinery.

Brazell now serves on the museum's board of directors and continues to collect machinery. The collection is on display at the museum's current location at the corner of East Broadway and Canyon Lake Drive in Lubbock, adjacent to MacKenzie Park and the American Wind Power Center.

"This museum is extremely important to the people of West Texas and the nation," said Angela Beesley, executive director. "An understanding of the role of agriculture in our nation's past is vital to the well being and economic stability of our country. That's why community leaders felt it was prudent to establish the American Museum of Agriculture to teach younger generations about agricultural history."

Beesley said the museum currently consists of a collection of farm tractors and equipment. "Yet, people will see some tools and other smaller items associated with households. We have 24 restored, historically accurate tractors that look as if they are brand new," she said.

The oldest piece of equipment is a threshing machine from the post-Civil War era. Also, housed in the museum is a collection of horse-drawn equipment similar to that used on the High Plains in the late 1800s; a 1924 Fordson; an array of cotton strippers; an M Farmall tractor; a John Deere Model G tractor; an Allis Chalmers Model 66 combine from the 1950s; and numerous other artifacts.

A special addition to the museum was the recent donation of a 71-piece pedal tractor collection by the Paul and Irene Brooks family of Hart. The collection includes all but four of the pedal tractors ever made.

Plans are in place for the museum's expansion, which includes a new 50,000 square-foot building on a 25-acre lot north of the museum's current location.

The new museum will be divided into sections with numerous themes, such as American farming; trials and tribulations of farm life; agricultural development in Texas; changes and progress in agriculture; tractors and farm machinery; and farms and the family.

Since water impacts all aspects of agriculture, the new museum will feature exhibits on water and irrigation.

"We foresee a time when the museum will have a complete section on irrigation, because it was vital to the Great Plains region," said Brazell.

The museum is seeking early irrigation equipment, including pumps, motors, "bud ball" engines, siphon tubes, and gated pipe. Future exhibits will depict development of irrigation technology from open, unlined ditches with siphon tubes to current subsurface drip irrigation.

Living history exhibits, including a replica of a 1900s farmstead and a working grain threshing operation, will be incorporated into the American Museum of Agriculture's attractions.

"In order to recreate a farmstead, we need gas-powered washing machines, implements, wood cutters, and other items common to a farmstead before electricity was available," he said. "Also, we don't want to just have a threshing machine with a tractor sitting beside it. We want to show a threshing scene where you can get an idea of all it took to harvest grain in the early days."

A research library is also planned. The museum would like to have a complete set of United States Department of Agriculture (USDA) yearbooks and census of agriculture books. The museum also hopes to establish an oral history library where people can record their recollections of life on the farm."

"When the new museum is completed, it will be a wonderful representation of American agriculture. However, additional funding and manpower is needed before we can break ground on the new building," said Beesley.

Currently, the museum is open only Fridays and Saturdays from 10 a.m. to 5 p.m. Yet, with enough volunteers, it could be open five to six days per week. Anyone who enjoys visiting with people about the history of agriculture is encouraged to volunteer.

Those wishing to volunteer or to make a monetary or artifact donation are invited to contact American Museum of Agriculture Executive Director Angela Beesley at (806) 239-5796. She may also be reached by e-mail at amadirector@door.net
